I believe that XM radio should be able to broadcast information, music, entertainment, etc. be it local, national or international. If the public didn't want this they would not be purchasing xm radios at such a phenomenal rate. You should be glad that this is available to us. When we travel, we don't have to search the dial for the information or entertainment we want, because we never lose these channels. I love it and hope that you listen to the voice of the PEOPLE and not just the influential. Thank you. Carol Sassman
